The South 40

Grain varities noted

By JAMES A. SMITH
Extension Agent

The recommended varieties of small grain for '84 seeding are: Winter Oats--Southern States 76-30, Coker 716, Cumberland, Pennwin; Barley--Barsoy, Sussex, Surry, Henry, Maury; Wheat--Coker 916, Coker 747, McNair 1003, Saluda, Massey, Wheeler, Feland, Pioneer 2550, Scotty, Tyler, Rye--Abruzzi.

We were unable to obtain sufficient copies of the description and yield data for distribution to all growers. If you would like a copy, pick up one from our office. Wheeler and McNair 1003 will be dropped from the recommended list after 1984.

Within these recommended varieties there are significant differences. I recommend you pick up a copy of the data and study the varieties carefully.

In mid August, one of our good dairymen came in with 17 soil samples. He represents the fields on which I will plant my '85 corn crop. This is good planning. I looked over the results. The pH ranged from 5.8 to 6.4 requiring from zero to 2.25 tons of lime per acre. The nitrogen requirements range from 100 to 150 pounds. The phosphorus requirements range from 10 to 65 pounds per acre and potassium ranged from zero to 140 pounds.

Knowing your requirements, getting the lime in place this fall and planning the fertilizer order can save and make dollars next year.

This producer has developed a good practice that needs to be emulated by others.

It's that time of year to take soil samples for the predictive nematode assay on fields where tobacco will be grown next year. These samples can be sent in between September 1 and December 1. We have bags and record sheets for your use.

In 1982, Appomattox growers submitted 23 samples--9 needed a nematicide applied.

In 1983, only 4 samples were submitted. One showed that a nematicide may increase yields. Our goal is for 50 samples in 1984. The sampled area should represent no more than 4 acres and at least 20 subsamples come from the area. Sample to a depth of 6 to 8 inches. There will be sample soil to fill the bag and provide for a soil fertility test, so you do two jobs at the same time.

The 3rd Annual Granite Hall Farm Sheep Field Day will be held October 9, 4:30 p.m., with a complimentary lamb barbeque. If you are interested in some diversification and possibly additional income, take a look at sheep. If you plan to attend, we need to know by October 5 in order for feeding arrangements to be made.

The Stocker-Finisher Clinic was well attended last Thursday. A follow-up of this program is a two-day bus tour of 8 outstanding stocker-finishing beef operations on November 14-15. The tour departs from Staunton 9:00 a.m. on the 14th and returns at 6:00 p.m. on the 15th.

Total cost--bus, food, lodging--will be $65.00 - $75.00. We have registration forms for those who would like to participate.

There are 7 All-American winners for 1985--five flowers and two vegetables. The flower varieties are: Geranium "Rose Diamond;" Gazania "Mini-Star Tangerine;" Celosia "Century Mixed;" Verbena "Trinidad;" Zinnia "Yellow Marvel."

The two vegetables are: Lettuce "Red Sails"--this is a loose leaf lettuce. According to the breeder, the leaves contain more nutritional value than other types: six times the Vitamin A as crispheads and three times the Vitamin C. Because of its attractive color, it can be grown as a border in a flower of herb garden. The other vegetable is Squash "Sunburst."

This item is hearsay--It came from a Kentucky publication reprinted from a St. Louis newspaper and credited to an arboretum near Newark, Ohio.

Every year we get a host of calls about how to control moles in the lawn. Our standard recommendation is use mole traps or treat the lawn with an insecticide to kill off the grubs.

I don't know whether this new idea works, but you may want to try it. One thing about having moles, it is a good indicator that grubs are feeding on the roots of your grass and tells you to do something about them.

The new idea is Juicy Fruit Chewing Gum. Determine which runs are being used. Wear plastic gloves to avoid any human scent. Unwrap the gum and roll it up like a little carpet; make a slit in a fresh run and drop in the gum. Then push the cut back together so the moles can't see any light.

I would be interested in knowing if you have success using this technique.

Happiness is 4-H

By FRANK H. SWEET
Extension Agent

Exhibits were returned from the Five County Fair on Sunday. If you had exhibits which we carried to the fair for you, please stop by our office and pick them up. Several Appomattox exhibitors won the top number of blue ribbons in the various categories at the Fair, including Karen Gilliam in Livestock, David Short in educational exhibits, Mike Mann in Field Crops and Mrs. Margaret Lee in Foods.

4-H projects from last year are due in the Extension Office by Monday, October 1. 4-H project work is most important and each member should strive to turn in at least one completed project. Projects will be judged and returned to members at their November meetings.

The Annual 4-H Officer Training Meeting is scheduled for Wednesday afternoon, October 3, from 3:30 - 5:00 p.m. in the auditorium of Appomattox Elementary School. All newly elected 4-H officers are asked to attend this important training session. Officers will be given the chance to practice their responsibilities during the training meeting.

Pledge sheets should be available this week for the American Cancer Society's Ten Mile Bike-A-Thon. Pledge sheets will be available in the libraries at AES, AMS and ACHS. The Bike-A-Thon will be held on Sunday afternoon, October 21, beginning at 2:00 p.m.

FRIENDS OF VIRGINIA CIVIL WAR PARKS, INC. 1984

BE A FRIEND

You are invited to become a CHARTER member of the FRIENDS OF VIRGINIA CIVIL WAR PARKS.

In October 1983, a group of concerned individuals met in Richmond, Virginia with the Superintendents of the Civil War Parks run by the National Park Service in Virginia with the idea of exploring ways of assisting the parks. At that meeting it was decided that there was a need for, and an interest in, forming a FRIENDS group to provide support and assistance to the five National Civil War Parks in Virginia: APPOMATTOX COURT HOUSE NATIONAL HISTORICAL PARK; FREDERICKSBURG AND SPOTSYLVANIA NATIONAL MILITARY PARK; MANASSAS NATIONAL BATTLEFIELD PARK; PETERSBURG NATIONAL BATTLEFIELD PARK; and RICHMOND NATIONAL BATTLEFIELD PARK. After two additional meetings and considerable discussion, a set of by-laws was approved and the FRIENDS OF VIRGINIA CIVIL WAR PARKS came into being on February 4, 1984.

Article II of the by-laws sets forth the purpose of the FRIENDS. In part it states: "The purpose of FRIENDS OF VIRGINIA CIVIL WAR PARKS is to assist the present and future National Park Service Civil War Parks in Virginia. to protect and interpret the historical resources therein contained for the benefit of this and succeeding generations and to promote the historical, scientific, educational, and interpretive activities of the Civil War Parks and generate private donations of cash and kind for these parks."

For this organization to be a success we need the assistance of each and every person interested in the study of America's past. With today's reduced Federal budgets the Park Service needs our assistance to continue to do the very fine job they have done in the past. You can help by joining TODAY.

The by-laws provide that the FRIENDS shall be governed by an Executive Board composed of 15 members, three from each of the five National Parks. On April 29, 1984, a meeting was held in Fredericksburg, Virginia, and the membership elected an Executive Board. The Board then, in accordance with the by-laws, elected the following officers, to serve for two years: Norman R. Stevens, Reston, Virginia, President; Dana Elizabeth Rice, Petersburg, Virginia, Vice President; Homer D. Musselman, Fredericksburg, Virginia, Secretary; and Dennis W. Madison, Richmond, Virginia, Treasurer.
